Description

The product includes two UFO Classic locks and three matching keys.

If needed, the lock can be mounted on rear or side sliding doors and ensures burglar resistance thanks to both its shape and the materials used. The spherical cap fits perfectly to the car body and leaves no room to pry open the doors. This means the UFO Classic secures your vehicle against drilling and tampering attempts.

The UFO Classic consists of two mounting plates that are fixed to the vehicle and a removable hemisphere. The hardened steel safety lock is only locked when this loose hemisphere is attached and locked manually with the key. It takes around 50 minutes to fit it to the door. The installation kit with template for the holes through the car body, two mounting plates and seals are included.

We reserve the right to make changes in the interest of technical progress, as well as correcting printing errors and mistakes. Pictures are similar, decorative material not included. With the publication of this data sheet, previous editions lose their validity. Version: 02.09.2025
