Description

Transport your small components and tools safely and tidily to your workplace in this L-BOXX 238 G, since this L-BOXX is equipped with a divider set 3F and an inset box set with 3 compartments (the inset box set consists of: 3x inset boxes 2x6 H63, including 3x dividers IB 2x0 H63). Individual boxes can be removed, providing maximum flexibility in your work. Individual inset boxes from the range can be combined for recurring tasks and, when required, removed from the L-BOXX and taken directly to the workplace. The L-BOXX can be subdivided by means of an inset box set, which provides you with a good overview of your small components and consumables and ensures they are quickly to hand. It also provides a good overview of stock levels at any time.

The divider set 3F subdivides the ample space of the L-BOXX 238 into three transverse compartments and is inserted underneath the inset box insert. Tools and work equipment can be securely stowed away and transported. The subdivision provides for enhanced organisation and, as a result, saves time, since there is no more need for lengthy searching.

The rigid foam lid insert seals the top of the inset boxes and prevents their contents from becoming mixed up.
