## SP S-BOXX G wide plastic window 05-11

Material no.: 6000012044 | Matchcode: SBB G SF 05-11 | EAN code: 4045294781941

### Description

Use the S-BOXX G width 05-11 in your van racking system or in your workshop as an ideal organiser for smaller components, like fittings, screws or spare parts. The integrated clear plastic window on the front of the S-BOXX provides a constant view of the contents within and lets you see in good time when an order needs to be placed for consumables. The opening on the top lets you simply and quickly remove the contents of the boxes. A practical complement to the S-BOXX are the dividers which allow the BOXX to be sub-divided into six compartments. The compartments enable the user to store various consumable materials in an S-BOXX without them becoming mixed up. The S-BOXX can be safely stowed in the Sortimo van racking system or the WorkMo on plastic slides on a standard shelf depth 5 (46 cm) and can, of course, be removed at any time and transported to your workplace. Accessories, such as labelling stickers, provide a good overview and simplify the re-ordering process for the articles. You can, for example, label your S-BOXXes with the article numbers of the contents and save yourself time when ordering.

The partition walls and labelling stickers are not contained in the scope of delivery.
