Description

The T-BOXX 120 contains basic equipment for load securing in your vehicle. Using the integrated ProClick hook, the T-BOXX 120 can be placed at various locations on the van racking system or in the vehicle. The load securing elements included are therefore quickly available and immediately ready to use.

Contains:

- 2x lashing belts with clamp buckle 3.5 m
- 1x load safety net 1000 x 1200 mm
- 1x anti-rattle mat 750 x 500 mm
- 1x load securing information flyer

The lashing strap is a proven means of load securing with tie-down lashings and there should be one in every vehicle. The load securing net has hooks at the corners and so can be fastened to the original lashing points in the vehicle. The net can be tightly secured over the cargo by tightening the integral clamp buckle straps.

The anti-rattle mat increases the friction between the floor and cargo, giving the cargo a secure hold in the loading space.

A flyer with useful practical tips on load securing is also supplied, essential as reference in every vehicle.
