Description

The hooks made of robust fibre glass reinforced plastic are designed exactly for the new oblong holes in the aluminium side panel of the van racking system. The hooks clamp themselves automatically in the punched-out holes of Sortimo's aluminium side panel and can be mounted or removed simply with one hand. The round hook for tools 40 was specially developed for dynamic loads in the vehicle and has a diameter of ca. 40 mm. You can hang tools and supplies for work, buckets, helmets or jackets on the aluminium side panel of the van racking system, which has the benefit that on the one hand they are quickly tidied away and on the other hand they are always easily accessible without even having to enter the vehicle.
