Manufacturer	Model	Wheelbase in mm	Length	Style of roof
Ford	Transit Connect 2014-2023	2662	L1	H1
Ford	Transit Connect 2014-2023	3062	L2	H1

### Description

An integrated load securing system is already included in the TopSystem Set Eco ProSafe Ford Connect. ProSafe is incorporated into the entire cross profile length of the TopSystem roof rack. As a result the ProSafe lashing straps can be easily and quickly hooked into the entire surface without requiring any additional accessories. Additionally attaching rubber inserts onto the cross members not only prevents the load from shifting, but also protects it from damage. ProSafe is Sortimo's professional load securing system. It can be used on the vehicle manufacturer's original lashing points, on the Sortimo van racking system and also on the integrated lashing points in the vehicle floor. By retrofitting ProSafe onto your roof rack, you now have an integrated load securing system for your entire vehicle, i.e. one belt system fits all.

The TopSystem Set Eco ProSafe Ford Connect can be installed onto the following vehicle type:

- Ford Connect as of model year 2014, wheel base 2662 and 3062 mm, low roof (H1)

The set consists of two cross members with a length of 1450 mm, as a result of which the roof surface is completely utilised. The TopSystem thereby ensures that the maximum loading area is at your disposal.

The mounting material and support legs are already included in the TopSystem Set Eco ProSafe.

We reserve the right to make changes in the interest of technical progress, as well as correcting printing errors and mistakes. Pictures are similar, decorative material not included. With the publication of this data sheet, previous editions lose their validity. Version: 12.08.2025
